

FILIPi SOARES DA SILVA

FULL STACK DEVELOPER • PYTHON, REACT & TYPESCRIPT

Florianópolis, SC — Brazil • filipi.soares.silva@gmail.com • +55 48 99933-0050 • [linkedin.com/in/filipiss](https://www.linkedin.com/in/filipiss) • github.com/Filipiss

PROFESSIONAL SUMMARY

Full Stack Developer with a versatile engineering profile focused on scalable software architecture and high-standard reactive interfaces. Hands-on experience delivering end-to-end solutions using **Python (Flask, FastAPI, SQLAlchemy)** on the backend and **React, TypeScript, and Design Systems** on the frontend. Proven track record working remotely for international companies and agencies (USA and Ireland), designing and consuming RESTful APIs, containerizing services with **Docker**, and maintaining an unwavering commitment to maintainability, clean architecture, and superior user experience.

PROFESSIONAL EXPERIENCE

Full Stack Developer • Eitree (USA | Remote)

Aug 2025 — Present

- **Full Stack Engineering:** End-to-end architecture and implementation of web modules utilizing Python (Flask, SQLAlchemy) on the backend and React with TypeScript on the frontend.
- **APIs & Persistence:** Design and consumption of structured RESTful APIs with data contract validation and efficient integration with relational databases.
- **DevOps & Environments:** Containerization of services, development, and testing environments via Docker, ensuring consistency between development and production.
- **Design & Interface:** Crafting dynamic and responsive user interfaces utilizing Styled-Components, organizing component libraries and modular folder architecture.

Front-End Developer • Loco (Dublin, Ireland | Remote)

Feb 2026 — Aug 2026

- **Front-End Engineering:** Creation, maintenance, and customization of high-impact visual interfaces for international digital agency projects.
 - **Themes & Ecosystem:** Advanced customization of templates, pages, and modular structures in WordPress, combining semantic HTML5, responsive CSS3, and JavaScript.
 - **Performance & Compatibility:** Optimization of load times, cross-device responsiveness, and cross-platform compatibility focused on Core Web Vitals.
 - **Integration & Plugins:** Strategic plugin configuration and management for secure implementation of business features and interactive user flows.
-

FEATURED PROJECTS & ENGINEERING

AI Assistant & Organic Chatbot • FastAPI, SSE Streaming, React, TypeScript

Production Case

- Multi-provider orchestration platform (Gemini, OpenAI, Groq) with real-time streaming via Server-Sent Events (SSE), sub-190ms latency telemetry, and resilient circuit breakers.
- Decoupled reactive interface in React and TypeScript with Markdown syntax highlighting and efficient state management.

Time Trackerígena • Python, Flask, SQLAlchemy, PostgreSQL, React, TypeScript

Operational Case

- Time allocation governance platform with ACID relational persistence, indexed aggregate queries, and reactive calendar UI with zero unnecessary re-renders.
 - Structured backend with secure authentication, modular RESTful endpoints, and containerized deployment.
-

TECHNICAL SKILLS & COMPETENCIES

Languages & Back-End: Python (Flask, FastAPI, SQLAlchemy), TypeScript, JavaScript, PostgreSQL, SQLite, RESTful APIs, Server-Sent Events (SSE), Asynchronous Programming.

Front-End & Interface: React, Next.js, Styled-Components, CSS3 / Sass, Semantic HTML5, Framer Motion, Design Systems, Accessibility (WCAG).

DevOps & Tooling: Docker, Git & GitHub, WordPress, Postman, Vite, Clean Architecture.

EDUCATION

B.S. in Computer Science • Universidade Estácio de Sá

Completed in Dec 2025
